EXAMINER

TORRES, MELANIE

ART UNIT PAPER NUMBER

3683

DATE MAILED: 02/06/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/689,008	Applicant(s) SCHUTZ, MICHAEL	
	Examiner Melanie Torres	Art Unit 3683	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 November 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 14 and 15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 14 and 15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawaura et al. (US 4, 477,061) in view of Knable et al. (US 4,711,463).

Re claims 1, 14 and 15, Kawaura et al. disclose a spring strut support bearing, comprising a top bearing having an inner ring (24) by way of which the top bearing can be affixed to the end of a piston rod (14) of a shock absorber connected to a vehicle body (16); an outer ring (28) surrounding the inner ring with radial clearance defining a gap therebetween, the outer ring being stationary with respect to the vehicle body; at least one elastic spring element (26) made of rubber-elastic material located in the gap formed by the clearance; wherein the inner ring has two end faces, on each of which has at least one elastically flexible stop buffer (30, 32) for limiting extreme deflection movements along a deflection direction defined by the motion of a shock absorber, each of the stop buffers having the capability of being brought into contact with counter stop faces (on elements 18 and 20), a central hole of each annular stop buffer arranged to receive the piston rod therethrough and the outer ring is press fit in a generally cylindrical portion joined to the vehicle body. (Figure 3)

Kawaura et al. do not teach the stop buffer of one end face substantially symmetric to the stop buffer of the other end face about a middle plane between one end face and the other end face. It would have been an obvious matter of design choice to modify Kawaura et al. by having symmetric stop buffers since applicant has not disclosed that having symmetric stop buffers solves any stated problem or is for any particular purpose and it appears the strut would perform equally well with a variety of stop buffer shapes. It has been held that a change in shape is an obvious matter of design choice which a person of ordinary skill in the art would have found obvious absent persuasive evidence that the particular configuration of the claimed buffers are significant. See MPEP 2144.04, IV. B. (In re Dailey, 357 F. 2d 669, 149 USPQ 47 (CCPA 1966))

Kawaura et al. do not teach wherein stop buffers are made of cellular polyurethane. Knable et al. teach a spring support (40) made of cellular polyurethane. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have made the buffers from cellular polyurethane to provide for dissipating jounce energy during motions of the strut.

Kawaura et al. do not teach wherein the annular stop buffer is independent from the elastic spring element. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the two components from a single component as an obvious matter of design choice.

Response to Arguments

Art Unit: 3683

3. Applicant's arguments with respect to claims 1, 14 and 15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie Torres whose telephone number is (571)272-7127. The examiner can normally be reached on Monday-Friday, 6:30 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James McClellan can be reached on (571)272-6786. The fax phone
